Art Unit: 2653

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-11,13-26 are rejected under 35 U.S.C. §102(e) as being anticipated by Itoh.

See Figs.2-4. Note, to the extent claimed, asymmetrical apertures 18a or 18b allows second ends 120a-d to performs to the same degree as claimed. Further note the construction indicated for the support in col.4, lines 14-21.

The claims also fail to define structure which clearly establishes the stated functional results: for example;

Application/Control Number: 10/600,638

Art Unit: 2653

- i) in claims 2&3 what claimed structure specifically causes or permits "the second ends of the conductors" to move out of the [support]plane or "bend independently with respect to the other ones"?
- ii) in claim 18 how can the limitation "opening that is contoured to a shape of all of the second ends of the conductors" support the accusation that this then "[defines] a plurality of apertures for accommodating independent movement of all of the second ends of the conductors" when the supposed 'shape' has not been claimed structurally; etc.
- 3. Claims 1-11,13-20 are rejected under 35 U.S.C. §102(b) as being anticipated by Erpelding(PN 5,631,786).

See Sheet 5 of Erpelding(...786). Note, to the extent claimed and understood, the structure as shown in Addendum A reads on and performs to the same degree as claimed. Further note the construction indicated for the support in col.5, lines 49-66.

Moreover, as finger 4 of Erpelding(...786) flexes, it would allow the conductors to independently move out of a plane defined by the support layer(shown in Addendum A), and depending on how finger 4 is moved, for example torsionally versus pure longitudinal bending, the conductors would experience small twisting and/or gimballing motions

4. For a complete response applicant should identify how the claimed structure of his invention defines over **all** the art of record.

Moreover, where the applicant disagrees with the reasoning and/or application of the prior art on critical points of the claims, they should identify how the claimed structure of their invention defines over **all** the art of record not just the applied art.

Where applicant believes that the art is redundant and/or superfluous relative to the critical aspects of the claimed invention the applicant may simply state so in rebuttal summary.

Also note, applicant's silence pertaining to claimed features will be taken as an indication that same is not of significant import in defining the scope of applicant's invention and may be considered as inherent in the prior art and/or obvious over the art of record.

5. If applicant has filed an information disclosure statement and has not received an office action that contain an initialed-off copy (or copies) of all such filed IDS's (or at least a

Application/Control Number: 10/600,638
Art Unit: 2653

comment to the disposition of such IDS'S in the body of the office action itself) applicant should apprise the examiner of such missing documentation [to the IDS's] in response to this office action so that the examiner can take appropriate action to supply same to the applicant.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2653

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ whose telephone number is (571) 272-7587. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM KORZUCH can be reached on (571)272-7589.

The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
